

Straight Boom Lift Parts

Parts for Straight Boom Lifts - Boom lifts are also referred to as aerial work platforms. They can comprise a platform or bucket that is attached to the end of a hydraulic lifting system. This kind of aerial work platform is normally found mounted on a flat-back pickup van, likewise referred to as a "Self Drive." Boom lifts are also existing on a stand-alone trailer or a self-moving platform. They are usually mounted on the rear of a truck and in this case, usually called a "bucket truck."

Boom lifts have a connected bucket which is intended for an individual to stand in and work from. There is commonly a duplicate set of controls which are used in order to control the bucket's position. The operator in the bucket can position themselves. Some boom lifts have telescoping lifting arms which allow much flexibility as far as the reaching capacity is concerned. Typically, there are automatic safety controls so as to prevent the device from tipping over. When operating in tight areas, articulated boom lifts are more available compared to stick booms, particularly when the application calls for clearing nearby obstacles.

Boom lifts are extremely popular in the agricultural sector where they were originally designed for use in orchards. This particular machinery enables the worker or fruit picker to find and pick fruits which are high in the trees. Similar equipment is utilized by telephone and cable businesses as well as electrical providers who do installation and maintenance on utility poles. Boom lifts could also come in handy for hanging Christmas banners and light displays.

rather than utilizing the conventional ladder, a lot of modern fire trucks make use of a boom lift instead. This kind of boom lift is called a snorkel and there are window cleaners who utilize them also. Boom lifts are used in a variety of industries. They are commonly relied on for exterior painting, and by arborists who have to work safely within high trees. Boom lifts are often found in the construction industry.

Various aspects of the entertainment business even heavily depend on boom lifts. Like for instance, Michael Jackson often started many of his live performances of his song "Beat It" while being on a moving boom lift. There were times he daringly hung off of the machine while holding onto the bars with his hands and feet for added effect. Movie sets use boom lifts often for hanging props and lights and helping with set decorating too.
